

Technical Information: Rpm signal acquisition clip from high voltage wire

By installing this clip it is possible to apply the antenna of your rev counter on the spark plug cable. Useful if you want to use your tachometer during road or track test sessions.

Technical data:

Details		Compatibility
Order code:	A.CL-AT1	All engines equipped with high voltage spark plug cable with diameter: 5 mm (0.196 inch)

Installation notes:

If the rpm value indicated by your Rev counter is incorrect or absent, increase the effectiveness of the antenna by winding the spark plug cable for about 2/3 turns before fixing it with the Clip.
